WELCOME ADDRESS

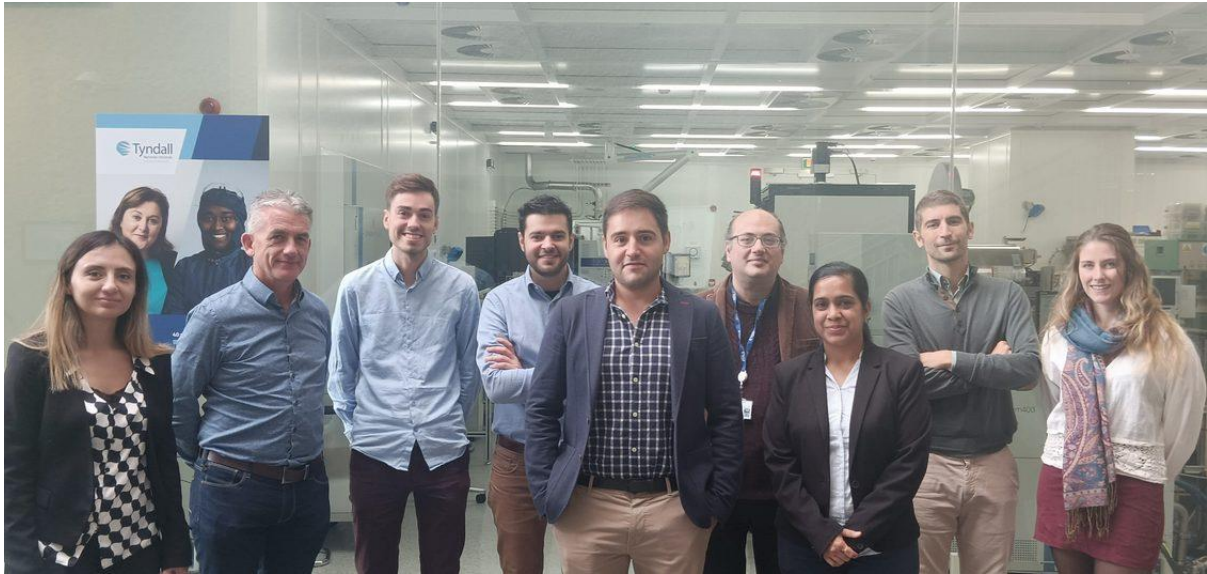

Welcome to the SmartSPIN Newsletter

Ready for the next phase!

As the first year of the SmartSPIN project draws to a close, it is time to look back on where we stand, what we have accomplished and look forward to what is next.

The SmartSPIN consortium met in Cork (Ireland) to celebrate the 3rd General Assembly meeting. The consortium discussed the milestones achieved so far as well as the planning of the following phases.

PROJECT PROCESS SO FAR

Recommendations to address the split incentive issue

SmartSPIN has established a **set of guidelines and recommendations** to optimise the approach around the **split incentive and smart energy services for the commercial rented sector**. To do it, Lawler Sustainability has carried out a study of the recommendations to address the split incentive issue, green leasing, on-bill financing, energy performance contracting and other related schemes such as metered energy efficiency transaction structure.

What are the Smart Energy Services Markets in the current commercial rented sector?

During the first year, the International Energy Research Centre (IERC) has led and conducted the **review of the smart energy services markets for commercial rented sector**. This evaluation was performed in countries represented by the SmartSPIN consortium - Greece, Ireland, The Netherlands, and Spain - as well as countries with matured ESCOs market.

Towards an efficient data analytics system for energy

The SmartSPIN consortium is continuously working to **enhance the data analytics system for energy**. In the last months, the efforts have specially focused on the capture, process and valorisation of the data streams arising from continuous building monitoring. To this end, the pilot sites coordinators have provided the first batches of data of the different case studies.
